Special Glue for Caps, pint (.5 liter)	" "	" "
Boring Set with heavy duty 1 step final Reamer Tube (2 1/4" OD)	" "	N.A.

Cable for BTC-1:

Cable for BTC-2, BTC-100X, and BTC 1.125 : 5 meter (16.4 ft.). Add \$11/ft. for extra length. Installation directions included.

Cable Strain Relief: For cables sold before June, 1999. Flexible plastic device guides and protects cable at exit from indexing handle. Saves wear and tear on the cable. Installation directions included.

Strain Relief Modification and Installation: same as above, done at our facility

Plans for Alignment Frame: Working drawings for steel frame. Holds boring tools and observation tubes at a consistent angle when inserting in ground; angle settings in 15-degree increments to 90 degrees. Simple metal fabrication and welding required.

Spare Copies of Operation Manual:

Demo Tape: Raw footage of underground activity magnified 15X to 100X with white and UV lighting. Useful for teaching. Please specify VHS, SVHS Hi-8mm, or CD format.

Camera Checkup: General maintenance, cleaning, lube, pressure test, and functional check for in-use or older Minirhizotron systems. Repairs and shipping are extra (see below).

TERMS

Shipping: Shipping and insurance is prepaid by Bartz Technology and added to invoice. All prices are FOB Origin and EX WORKS Santa Barbara.

Domestic Orders: Full payment due 30 days after shipment (net 30).

Direct International Orders: Unless otherwise negotiated, 100% advance payment to accompany purchase order. A wire transfer fee may apply.

Documentation Charge: on all international orders, 1% of value of goods, with a minimum of \$45.

WARRANTY A one-year-warranty is provided on BTC products. Out-of-Warranty repairs will be quoted on an individual basis for labor at 74.16/hour plus parts. All repairs include a minimum 1-hour diagnostic charge.

We are happy to discuss customized orders for your special requirements. In the past these have included extra long handles, observation tube extensions, and adaptations for odd diameter tubes.
